Company: Centrisys Corporation is a global leader in decanter centrifuges, dewatering systems and other technologies used in dairy and agricultural operations, as well as municipal and industrial applications worldwide.

Its line of decanter centrifuges, which is engineered specifically for dairy operations, far surpasses the performance of conventional systems used in manure management to help dairymen improve the bottom line – and enhance ongoing efforts aimed at environmental stewardship.

Founded: 1987

Headquarters: Kenosha, WI

Dairy expertise: Centrisys first introduced decanter centrifuges to the dairy industry in the mid-2000s after extensive application and testing in dairy operations throughout the United States. Its R&D efforts included close collaboration with Dairy Specialists, a Colorado-based company with more than 40 years of experience building some of the largest dairies in the United States.

Key personnel:

- Michael Kopper, CEO and Founder
- George Kueppers, Vice President of Service
- Josh Gable, Agricultural Sales Specialist

Products:

- DT Series Decanter Centrifuge line: Decanter centrifuge designed specifically to match the characteristics of dairy manure for highly efficient and cost-effective solids separation - while providing years of reliable service in demanding dairy applications.
- Mobile Dewatering Systems: Designed for those with multiple locations or short-term needs, each system incorporates a DT Series Decanter Centrifuge and essential auxiliary components in a self-contained and mobile package to speed installation and startup, while delivering the same performance of long-term centrifuge installations.

Optimization: Each DT Series Decanter Centrifuge and Mobile Dewatering System is optimized to meet the unique needs of each dairy process – and optimized to produce the best results based on established goals.

Service and support: Centrisys is rooted in service and support having started as a centrifuge equipment repair and maintenance company. It evolved into a technical leader in designing and building decanter centrifuges and dewatering systems. Service and support highlights:
• Headquarters, manufacturing and repair facility located in Kenosha, WI
• Full spare parts inventory available at Kenosha and Stockton, CA, repair facilities can be dispatched within 24 hours.
• Service personnel can be available to address any onsite issue within 24–72 hours for all brands of decanter centrifuges.

Certification: ISO 9001-2008 certified
